

### Instructions for Installing JMP from the Campus Network

NOTE: YOU MUST BE CONNECTED TO THE CAMPUS NETWORK TO INSTALL PROGRAMS.

#### For PC users:

- 1.From the "Metro" screen, type **Control Panel**.
- 2.Select **Control Panel**.
- 3.In the Programs section, select **Get programs**.
- 4.Double click on the program you wish to install: JMP 12 Pro
- 5.Wait while the program installs, which could take several minutes.

#### For Mac users:

- 1.Double click on your hard disk. This should be the icon on the upper right-hand corner of your desktop.
- 2.A new finder window should now be open. An option named **Applications** should appear in the left- handcolumn of the window. Click once here.
- 3.A folder named **WSU\_Additions** should appear. Double click on this folder.
- 4.There should be two separate applications in this folder: "Printing Additions" and "SoftwareAdditions." Double-click on **Software Additions**.
- 5.On the End-User license agreement screen, select **Continue**.
- 6.Your computer will prompt you for a password. This is the password you use to log on to your WinonaState Webmail.
- 7.Click the **Select Software** button on the bottom-right.
- 8.A list of available programs should now be displayed on your screen. Check the box next to the program you wish to install: JMP 12 Pro.
- 9.Click the **Install Software** button.
- 10.The Installer will prompt you for your password. Enter it and press OK.
- 11.Continue through the installer as normal, select **Continue**, and then install.
- 12.Complete the installer, and it will close automatically.
- 13.Winona State Software additions will perform a cleanup procedure. When completed, press the quit button.
